

Results-driven Information Technology undergraduate with hands-on experience in Software Development, Machine Learning, Data Analytics, and Web Application Development. Proficient in Python, Flask, Scikit-learn, Pandas, NumPy, HTML, CSS, JavaScript, and MySQL with practical exposure to building AI-driven and data-centric applications. Developed real-world projects including Sign Language Translation and Car Price Prediction systems involving data preprocessing, model training, visualization, and performance optimization techniques. Strong analytical, problem-solving, and collaborative abilities with a passion for developing scalable and user-focused software solutions in dynamic technology environments.

SKILLS

Programming	Python, Java, JavaScript, SQL
Web Technologies	HTML, CSS, Flask, React.js
Machine Learning	Machine Learning, Data Preprocessing, Model Training, Random Forest
Database	MySQL
Tools and Platforms	Git, GitHub, VS Code, Jupyter Notebook
Core Skills	Problem Solving, Web Development, AI-Based Applications, Team Collaboration, Communication Skills

TECHNICAL EXPERIENCE

Training and Internship Program in Machine Learning

May 2025 — Jun 2025

SunBeam Infotech Pvt. Ltd.

Pune, Maharashtra

- Participated in 5-week training and internship in Data Analytics and Machine Learning with practical exposure to data preprocessing, analysis, visualization, and predictive modeling techniques using industry-standard tools and workflows.
- Worked on 5+ real-world datasets using Python libraries such as NumPy, Pandas, Matplotlib, and Seaborn to perform data cleaning, transformation, statistical analysis, and generate 15+ visual insights for trend identification.
- Designed 3+ interactive Power BI dashboards and analytical reports to visualize business trends, improve data interpretation, and support efficient data-driven decision-making processes.

Artificial Intelligence and Machine Learning

Jun 2024 — Jul 2024

IBM SkillBuild

Online

- Acquired practical knowledge in Artificial Intelligence and Machine Learning through IBM SkillBuild training under IBM SkillBuild (May 2024) with practical exposure to ML concepts and model development.
- Built and optimized machine learning models using Python on structured and unstructured datasets with data preprocessing and evaluation techniques.
- Improved model prediction accuracy by 10–15% through model optimization and performance tuning methods.

PROJECT

Real-Time Bidirectional Sign Language Translation System

Jun 2025 — Apr 2026

- Developed a real-time Bidirectional Sign Language Translator using Python, CNN-LSTM, MediaPipe, OpenCV, and Flask to improve communication for hearing-impaired individuals.
- Implemented 21-point hand landmark detection and deep learning-based gesture recognition capable of identifying 50+ static and dynamic ISL gestures with low-latency performance.
- Built Sign-to-Text and Text-to-Sign translation modules integrated with text-to-speech functionality, enabling seamless real-time interaction between Deaf and non-sign users.
- Optimized the system for offline execution on standard devices without specialized hardware, improving accessibility and supporting inclusive communication aligned with SDG 4 and SDG 10.

Car Price Prediction

May 2025 — Jun 2025

- Built a machine learning web application trained on 400K+ vehicle records to predict used car prices using multiple input parameters and real-world datasets .
- Applied data preprocessing, feature encoding, outlier removal, and model training techniques using Linear Regression, XGBoost, and Random Forest algorithms.
- Integrated Flask APIs and responsive user interface components for real-time car price prediction and smooth user interaction.
- Generated 15+ analytical visualizations using Matplotlib and Seaborn for exploratory data analysis, trend identification, and model performance evaluation.

EDUCATION

Bachelor of Engineering in Information Technology, Finolex Academy of Management and Technology

Nov 2022 — May 2026

Higher Secondary School Certificate , Jawahar Navodaya Vidyalaya, Ratnagiri

Apr 2021 — May 2022
